KPI Dictionary — Business Insights Dashboard

Assumption: Refresh Cadence is listed as "Daily" for all metrics since the underlying data is loaded via a static script, not a live pipeline. Update this column once real pipeline scheduling exists.

Metric Name	Domain Owner	Business Definition	Formula	Data Source	Refresh Cadence	Status
Total Customers	Product	Total number of customers acquired by the bank	`COUNT(*)`	customers	Daily	Certified
Active Customers	Enterprise BI	Customers with an open account and any activity (transaction or loan repayment) in the trailing 90 days	Open account AND activity within trailing 90 days of the reporting date	customers, accounts, transactions, loans, loan_repayments	Daily	Certified
Total Revenue	Finance	Interest income earned from loan repayments (no fee income in current data)	`SUM(paid_amount * rate = interest_rate/100`	loan_repayments, loans	Daily	Certified
NPL Ratio	Credit	Share of the outstanding loan portfolio that has defaulted	`SUM(loan_amount WHERE loan_status='defaulted') / SUM(loan_amount WHERE loan_status != 'fully_paid') * 100`	loans	Daily	Certified
Total Origination Volume	Credit	Total amount of loans ever originated (funded), all statuses	`SUM(loan_amount)`	loans	Daily	Certified
Active Origination Volume	Credit	Total amount of loans currently in active repayment (excludes delinquent/defaulted)	`SUM(loan_amount WHERE loan_status='active')`	loans	Daily	Certified
Total Savings Balance	Finance	Total balance held in active savings accounts	`SUM(balance WHERE account_type='Savings' AND status='active')`	accounts	Daily	Certified
New Customer Acquisition	Product	Number of new customers signed up per month	`COUNT(customer_id)` grouped by month	customers	Daily	Certified
Customers by Channel	Product	Breakdown of customers by acquisition channel	`COUNT(*)` grouped by `acquisition_channel`	customers	Daily	Certified
Customer Churn Rate	Product	Monthly rate of account closures relative to active accounts at start of month	`COUNT(closed in month) / COUNT(active at month start) * 100`	accounts	Daily	Certified
Account Growth by Type	Finance	Monthly new account openings by account type	`COUNT(account_id)` grouped by month, `account_type`	accounts	Daily	Certified
Loan Origination (Amount & Count)	Credit	Monthly loan origination volume and count	`SUM(loan_amount)`, `COUNT(loan_id)` grouped by month	loans	Daily	Certified
New Loan Applications	Credit	Monthly application volume by pipeline stage	`COUNT(application_id)` grouped by month, `stage`	loan_applications	Daily	Certified
Loan Status Mix	Credit	Distribution of loan amount by current status	`SUM(loan_amount)` grouped by `loan_status`	loans	Daily	Certified
Transaction Amount (Credit/Debit)	Finance	Monthly transaction value split by credit and debit flow	`SUM(amount)` grouped by month, flow_type (deposit=Credit, else Debit)	transactions	Daily	Certified
Approval Rate	Credit	Share of applications that reach approved or funded stage	`COUNT(stage IN ('approved','funded')) / COUNT(*) * 100`	loan_applications	Daily	Certified
Disbursement Rate	Credit	Share of all applications that ultimately get funded	`COUNT(stage='funded') / COUNT(*) * 100`	loan_applications	Daily	Certified
On-Time Repayment Rate	Credit	Share of due installments paid on or before their due date	`COUNT(paid_date NOT NULL AND days_late<=0) / COUNT(due_date<=today) * 100`	loan_repayments	Daily	Certified
Total Overdue Amount	Credit	Amount still owed on installments past their due date	`SUM(due_amount - COALESCE(paid_amount,0))` where unpaid/late and past due	loan_repayments	Daily	Certified
Credit Funnel	Credit	Applications reaching each stage of the credit pipeline (cumulative)	`COUNT(*)` filtered by stage reached	loan_applications	Daily	Certified
Rejection Reasons	Credit	Breakdown of why rejected applications were declined	`COUNT(*)` grouped by `rejection_reason` where `outcome='rejected'`	loan_applications	Daily	Certified
Time-to-Decision (Funded vs Rejected)	Credit	Average days from application to final funded or rejected decision, by month applied	`AVG(last_status_updated_date - applied_date)` outcome	loan_applications	Daily	Certified
DPD Bucket Distribution	Credit	Currently unpaid installments grouped by days past due (0-30 / 31-90 / 91+)	`COUNT(DISTINCT loan_id)`, `SUM(due_amount-paid_amount)` grouped by days_late bucket, where `paid_date IS NULL`	loan_repayments	Daily	Certified
Balance Holders (Finance's "Active Customers")	Finance	Customers with a positive balance in any account	`COUNT(DISTINCT customer_id) WHERE balance > 0`	accounts	Daily	Domain-specific
Active Transactors (Product's "Active Customers")	Product	Customers with a transaction in the last 30 days	`COUNT(DISTINCT customer_id)` with `transaction_date` within trailing 30 days	accounts, transactions	Daily	Domain-specific
Current Borrowers (Credit's "Active Customers")	Credit	Customers with an open loan (active or delinquent)	`COUNT(DISTINCT customer_id) WHERE loan_status IN ('active','delinquent')`	loans	Daily	Domain-specific
